

HUNT BOILERS HEAT RECOVERY CONDENSING UNITS

The **HUNT** Heat Recovery Condensing Unit (HRCU) product range is specifically designed to fit to our TN-AR Hot Water Heaters.

Depending on the return water temperature from the circulating system, the HRCU can gain up to 10% additional heat recovery over and above the combustion efficiency of the TN-AR product. The key features of the HRCU product range include:

- Significantly lower fuel costs and lower greenhouse gas emissions
- Minimal additional pressure drop for both the water and flue gas circuits
- Designed and manufactured to AS1210
- All condensing areas manufactured from suitable grades of stainless steel
- Can also be supplied suitable for direct retro fitment to most makes of existing hot water heaters
